Education

Bannari Amman Institute of Technology

Bachelor of Technology in Artificial Intelligence and Data Science- CGPA 7

Nov 2021 – May 2025

Sathyamangalam, Tamilnadu

Government Hr. Sec. School

Higher Secondary Schooling- 75 percentage

Jun 2020 – March 2021

Coimbatore, Tamilnadu

Experience

GammaStack

Solution Engineer

Mar 2026 – Present

Bengaluru, Karnataka

- Developing and maintaining backend services using JavaScript and modern software engineering practices.
- Collaborating with cross-functional teams to design, implement, and optimize scalable application features.
- Participating in code reviews, debugging, testing, and performance optimization activities.
- Working with REST APIs, databases, version control systems, and agile development workflows.

Tap Academy

Software Development -Intern

Jun 2025 - Dec 2025

- Collaborating with mentors and peers to build and enhance real-world software solutions. And Gaining hands-on experience in Java, Spring Boot, and full-stack development
- Implementing object-oriented design principles and writing clean, maintainable code. And Participating in code reviews, debugging, and optimization to improve application performance.

Projects

Expense Tracker API | *Node.js, Express.js, MongoDB, JWT*

GitHub | Live Demo

- Developed a RESTful Expense Tracker API with JWT authentication and role-based access.
- Implemented income, expense, and financial summary management.
- Designed MongoDB schemas and centralized error handling.
- Deployed backend and documented APIs using Postman.

Provably Fair RNG Microservice | *Node.js, Express.js, REST APIs, JWT*

GitHub | Live Demo

- Developed a Provably Fair Random Number Generator microservice using cryptographic hashing techniques to ensure transparent and verifiable game outcomes.
- Designed REST APIs for RNG generation, fairness verification, and result validation
- Implemented secure server seed and client seed mechanisms to enable independent verification of generated results.

Technical Skills

Language: Java, JavaScript

FrontEnd: HTML, CSS

DataBase: MySQL, MongoDB

Backend: Node.js, Express.js, Spring Boot

Developer Tools: Git, GitLab, VS Code, Eclipse, Postman

Core CS: DSA, OOP, DBMS, OS, Computer Networks

Achievements

BIT Hack'23

Sept 2023

BIT

- Developed an innovative News Summarization Bot using NLP and ML to automatically generate concise news summaries in real-time. Delivered a functional prototype within a 36-hour hackathon, demonstrating strong problem-solving skills and collaboration.

Course Certification

Sept 2022

Infosys Springboard

- The Data Science course provides a solid foundation in data collection, cleaning, and preprocessing, along with exploratory data analysis using visualizations. It covers key machine learning algorithms, model evaluation, and data visualization techniques.
